

# Eastern Alloys - Zinc Bar Stock

*Helping Customers Succeed with Quality Products and Services.*

Continuous Cast (Con-Cast) Zinc bar stock is a high quality product which comes in a variety of shapes and sizes. It is a unique product and is typically sold for the following purposes :

## Prototyping

There are many ways to prototype zinc die castings. Machining prototypes from con-cast zinc bar stock is one of the fastest, most accurate and economical methods available.

## Low Volume Production

Zinc Bar stock is also useful for low volume production:

- End of life products when it is not economical to build a new die casting tool.
- Initial production to help fill orders prior to the tool build.
- Intermediate production due to die casting issues.

## Bearings

Zinc bearings have many desirable attributes and tend to last 3-5 times longer than Bronze 660 in environments with heavy particulate. Consider Zinc bearings in the following types of equipment:

- Construction
- Forestry
- Mining
